SWORXZ APOLLO II NITRO POWER PRO RTR INSTRUCTION MANUAL

INSTRUCTION

Introducing the new APOLLO II Pro Nitro RTR 1/8th scale off-road professional ready to run buggy from SWORKz. The 1/8th APOLLO II Nitro buggy is a Pro RTR based on the pro S350 but with an updated S35-3 buggy center layout.

The APOLLO II Nitro buggy incorporates many of the race-inspired features from the S35-3 Pro Kit. This buggy provides precise feedback, a nimble and balance feel that will suit drivers of all levels. The SWORKz design team put their efforts into proper weight distribution for the APOLLO II Nitro buggy. Proper weight distribution proved to be instrumental to the setup during the testing phase of the APOLLO II Nitro buggy.

The SWORKz APOLLO II Pro Nitro RTR buggy comes standard with many high quality parts like a T7075 aluminum chassis (with the same S35-4 chassis hard coating process), front and rear shock towers. It also has S35-3 Pro Kit's 16mm BBS Racing Shocks System, High Performance Crown and Pinion Gears and oil filled differentials providing traction and balance on multiple off-road surfaces.

The S35-3's centre plastic BBD diff system provides better acceleration for the APOLLO II Nitro buggy. It uses the S35-3 radio tray system that gives precise throttle and braking response.

The pivot ball steering system gives the driver sharp and accurate turning feedbacks. The APOLLO II Nitro buggy comes with a race inspired base set up that is easy to drive.

The SWORKz SES-2S steering and throttle servos (with 12kg metal gears) are made by SAVOX. This RTR also includes a 2.4G Radio System.

A pre-cut painted body shell is also included.
